The World As We Know It...

Look around you, from:

- » mobile phones to thermostats,
- » cars to toothbrushes,

just about every device has a computer in it.

But,... our methods to create the software are not keeping up with the increasing demand.

Assumptions, Assumptions, Assumptions...

“A discipline’s basic assumptions about reality determine what it focuses on. [...] For a social discipline [...] the assumptions are a great deal more important than are the paradigms for a natural science. [...]”

“A social discipline [...] deals with the behavior of people [...]. Practitioners will therefore tend to act and behave as the discipline’s assumptions tell them to.”

Drucker, Peter F. *Management Challenges for the 21st Century*. HarperBusiness. NY, NY. 1999.

I. Writing

Writing Invented around:

- » 3300 BC Egypt, Mesopotamia, China
- » 800 BC Greek Alphabet

Tomb of Queen Amonherkhepsef
In ancient Egypt, scribes used hieroglyphs to record state documents and important historical events. Hieroglyphs with religious purposes also were painted on tomb walls and wooden coffins, such as these hieroglyphs from the tomb of Queen Amonherkhepsef, located in the Valley of the Queens.

II. Books

Writing Invented around:

- » 3300 BC Egypt, Mesopotamia, China
- » 800 BC Greek Alphabet

Books Invented

- » 1300 BC China
- » 500 BC Greece

Section of the Egyptian Book of the Dead
The Egyptian Book of the Dead was a text containing prayers, spells, and hymns, the knowledge of which was to be used by the dead to guide and protect the soul on the hazardous journey through the afterlife. Beginning in the 18th Dynasty, the Book of the Dead was inscribed on papyrus. This section of one such book, from the early 19th Dynasty, shows the final judgment of the deceased (in this case Hu-Nefer, the royal scribe) before Osiris, god of the dead. Hieroglyphs as well as illustrations portray the ritual of weighing the deceased's heart to determine whether he can be awarded eternal life.

III. Movable Type & Printing Press

Writing Invented around:

- » 3300 BC Egypt, Mesopotamia, China
- » 800 BC Greek Alphabet

Books Invented

- » 1300 BC China
- » 500 BC Greece

Printing Press

- » 1450 to 1455

Early Printing Press
Invented by Johannes Gutenberg around 1450, the printing press made the mass publication and circulation of literature possible. Derived from the presses farmers used to make olive oil, the first printing press used a heavy screw to force a printing block against the paper below. An operator worked a lever to increase and decrease the pressure of the block against the paper.

IV. Computers and The Internet

Writing Invented around:

- » 3300 BC Egypt, Mesopotamia, China
- » 800 BC Greek Alphabet

Books Invented

- » 1300 BC China
- » 500 BC Greece

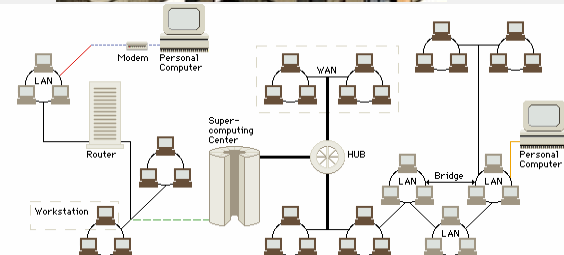

Printing Press

- » 1450 to 1455

Computers and the Internet

- » 2nd half of 20th Century

Internet Topology
Connecting individual computers to each other creates networks. The Internet is a series of interconnected networks. Personal computers and workstations are connected to a Local Area Network (LAN) by either a dial-up connection through a modem and standard phone line or by being directly wired into the LAN. Other modes of data transmission that allow for connection to a network include T-1 connections and dedicated lines. Bridges and hubs link multiple networks to each other. Routers transmit data through networks and determine the best path of transmission.

Examine How You Acquire Knowledge

0th Order of Ignorance: Lack of Ignorance.
You know.

1st Order of Ignorance: Lack of knowledge.
You know the question. Uncertainty.

2nd Order of Ignorance: Lack of awareness.
This is a real problem: not only you don't know the answer, you don't even know what the question is. Ambiguity.

3rd Order of Ignorance: Lack of process.
You don't have a process to find out what it is that you don't know.

4th Order of Ignorance: Meta Ignorance. You don't know about the orders of ignorance. You are past this. ☺

Armour, Phillip G. *The Five Orders of Ignorance*. Comm. of the ACM. Vol.43. No.10. Oct. 2000.

Home | Situation | Complication | What Have We Tried? | A Strategy | Conclusion

What is Your Software Development Performance?

Have you been thinking about it before?

- » Do you know your "batting average?"

Software Development Performance is the
complexity of all activities that an individual
or team does in order to create software.

What Information Do We Need?

All knowledge workers must answer the following questions:

1. What information do I owe to the people with whom I work and on whom I *depend*?
 - a. In what form?
 - b. And in what time frame?
2. What information do I need *myself*?
 - a. From whom?
 - b. In what form?
 - c. And in what time frame?
