Building Blocks
of Software Project
Success

Steven Teleki

Managing Director of Engineering, The Advisory Board Company

Past Chair, IEEE Computer Society, Austin Chapter

What leads
to success?

PASSION

SERVE

WHAT LEADS TO **SUCCESS**

PUSH

FOCUS

GOOD

PERSIST

IDEAS

St. John, Richard. Secrets of Success in 8 words, 3 minutes. TED. Feb 2005.

What is software project **success**?

Happy, satisfied, profitable customers?

Happy, productive, proud team?

Profitable organization?

Defect-free software released on time?

Success is:

›› achieving the project's objectives.

Why aren't **more** projects successful?

Many reasons, … plausible excuses.

Success =
  » Build the right software +
  » Build the software the right way.
This talk focuses on Development & QA.

What are the building blocks of software project success?

Build a Team

Build a Contrarian Team and Keep it Together

Hiring Rule #1:

» Find people with a variety of points of view.

Hiring Rule #2:

» "Smart, Disciplined, and Gets Things Done!"

Change the assignments, but don't change the team.

25 October 2012

"Do not be afraid. Do not be satisfied with mediocrity!"
Pope John Paul II.

25 October 2012
10

"Mediocrity knows nothing higher than itself, but talent instantly recognizes genius!"

Sir Arthur Canon Doyle

"When two people always agree, one is unnecessary!"

Dr. Robert H. Schuller

Pastor, Crystal Cathedral

Order

Focus on Fundamentals

What are the fundamentals?

Coupling
» is the relationship between software parts

Cohesion
» the degree to which the responsibilities of a single part are logical and consistent
Cyclomatic complexity
» the number of the linearly independent paths through a program's source code

What are the fundamentals? (continued)

Contracts: preconditions, postconditions, invariants, interface definitions

Configuration management

Dependency management

Plan & Review

"You can be sure our plan was perfect. It's just our assumptions were wrong."

Ken Olsen
Founder & CEO
DEC (for 35 years)
1991

Plan Your Work, Review, Adjust, Replan

Why?
- » The plan is the basis of commitments.
- » To be successful you must be able to make commitments that you can meet—at a profit.

What is a plan?
- » A solution embedded in a list of tasks for the work that needs to be done to achieve the desired outcome.

How?
- » Plan in detail. Task length: 45-90 minutes.

Manage Packaging

Manage the physical design and packaging

Physical design

» addresses the issues surrounding the physical entities of a system (e.g., files, directories, and libraries) as well as organizational issues.

Lakos, John. Large Scale C++ Program Design. Addison-Wesley. Reading, MA. 1996.

OK

Release Often

Release early! Release often!

Release

- » The action of making a product available for general purchase.
- » …from one phase to the next…
- » Make it mean something!
- » Make it mean: DONE!

Automate

Automate, Automate, Automate!

There is no reason for a human to do something twice that can be automated!

Automate:

- » Build (multiple times a day)
- » BVT, FVT, SVT (daily)
- » End-to-End user test scenarios (daily)
- » Release processes (weekly)

25 FEET

Measure & Improve

Track Effective On-Task Time (EOT)
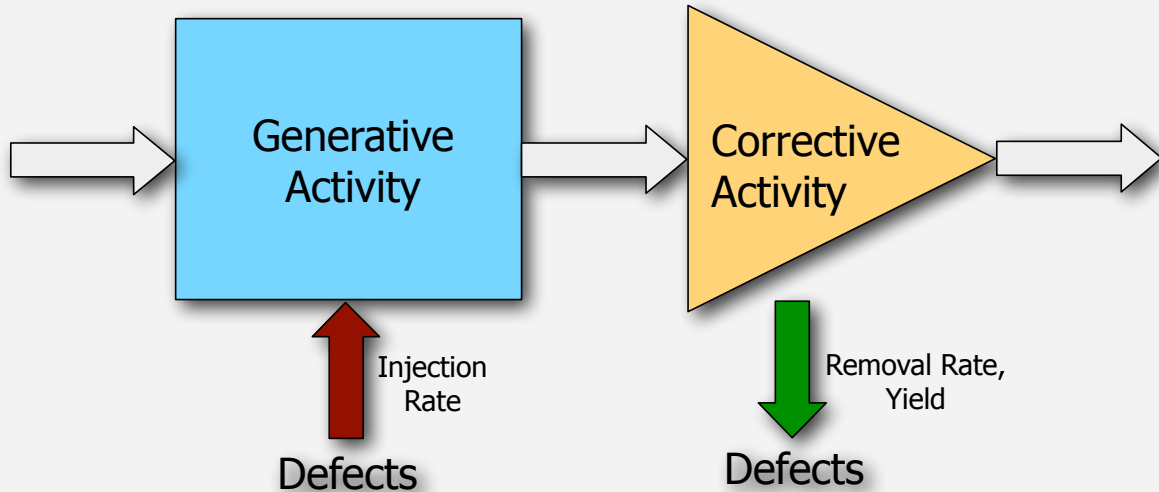

The time **effectively** spent on project work.

Doesn't include:

>> Reading email (usually even if it is project related)

>> Meetings (except well-defined project meetings)

>> Lunch time, breaks, phone conversations, etc.
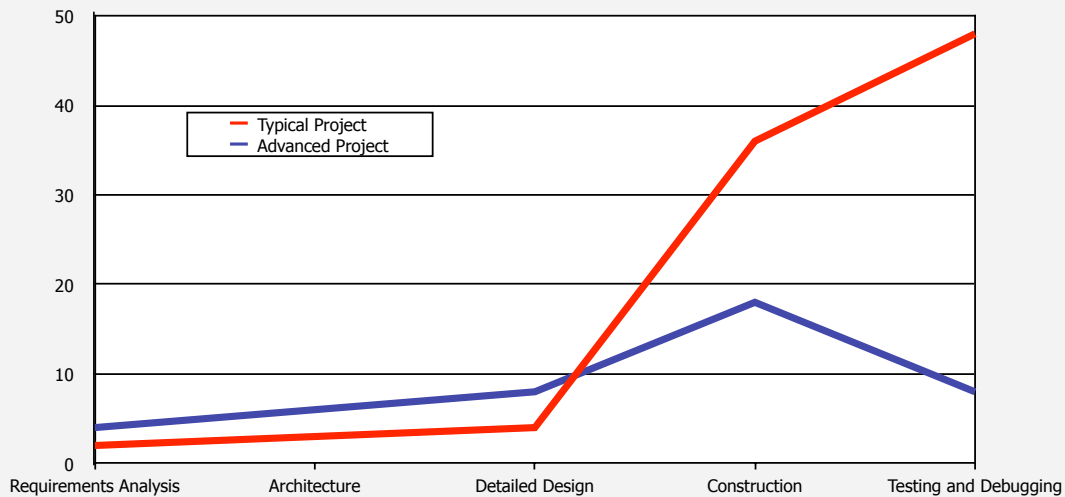

Measure your EOT per week.

>> Best organizations in the world get **20+ hrs/week**.

>> You may only get about 3-5 hrs/wk the first week. You should get up to 15 hrs/wk in a few weeks.

Assemble Processes with the Process Building Block

Differentiate Work Phases

Advanced software development approaches require more work during the early stages of the project to eliminate enormous amount of unnecessary work in the later stages of a project.

McConnell, Steve. After the Gold Rush. Microsoft Press. 1999.

Learn Always

DISTINCT … OR EXTINCT!

"If there is nothing very special about your work, no matter how hard you apply yourself, you won't get noticed and that increasingly means you won't get paid much, either."

Michael Goldhaber, Wired

Focus on Your Talents

What is a talent?

"A talent is a recurring pattern of thought, feeling, or behavior that can be productively applied."

Every role performed *at excellence* requires talent.

"Michelangelos of housekeeping."

Buckingham, Marcus, Curt Coffman. First, Break All The Rules. Simon & Schuster. NY, NY. 1999.
Peters, Thomas J. The Circle of Innovation. Random House. New York, NY. 1997.

"In every human activity the law of the farm governs."

"There is no cramming on the farm."

Corn Granary, Eastern Europe, 2007

Stephen R. Covey
